AGS-SP-076-H

HOLDER PART OF THE AGS-076 SENSOR

DESCRIPTION

Valmet 

1 GENERAL

The holder part of the AGS will mechanically fit the AGS-house to the refiner stator plate. There are several types of holders for different lengths, threads and sealing. The AGS-SP-O76-H will fit the flat zone AGS in a Valmet RGP-76/82 CD refiner.

The holder is included in a new AGS sensor but can also be bought as a spare part. The holder is replaced if the thread is damaged, if the sealing surface is damaged or if the contact surface to the segment plate is damaged.

2 SEALING

This type of holder includes no sealing; the part is instead sealed with a special sealing washer mounted on the refiner housing.

3 MOUNTING

The holder is mounted directly to the AGS house (AGD-HM3) and the sensor tip must be mounted afterwards.

Unscrew the locking nut, mount the holder and then put the locking nut back on again.

The locking nut shall not be tightened yet; this to assure that the holder can be rotated when mounting the AGS sensor to the refiner.

Tight the locking nut when the AGS sensor is tightened toward the refiner plates.
